

# ALWAYS READY — POWER WITHOUT DEPENDENCE

How One Prepper Uses OffGrid Pro™ for Daily Power and Emergency Readiness

## 👤 CUSTOMER PROFILE

A dedicated prepper focused on self-reliance, resilience, and long-term energy independence. His goal: reliable power for daily use, tools, and essential systems—without relying on the grid or fuel.

## ⚠ CHALLENGE

- Short runtimes (2–4 hours)
- Gasoline dependence during outages
- Loud, fume-producing operation
- Low cycle life (800–1,000 cycles)

He needed a silent, indoor-safe system built for daily use and long-term emergencies.

## 💡 SOLUTION

- Extended runtime: 9792Wh capacity
- Long lifespan: LiFePO<sub>4</sub> battery (6,000+ cycles) for 10–15 years of use
- Serious output: 7,200W peak / 3,600W continuous
- Safe indoor use: Silent, fume-free operation
- Off-grid flexibility: Dual 120V/240V support and up to 3,700W solar input

## ✓ HOW HE USES IT

### DAILY

- Powers garage workshop tools
- Runs chargers, lights, and electronics

### EMERGENCY

- Refrigerator (55–60 hrs)
- Lighting (3–4 days)
- Radios, fans, and essential long-term gear

*“This isn’t just backup power—it’s independence.”*
